this book explores for the first time the broad range of ways in which christian thought intersects with american legal theory eminent legal scholars including stephen carter

thomas shaffer elizabeth mensch gerard bradley and marci hamilton describe how various christian traditions including the catholic calvinist anabaptist and lutheran traditions understand law and justice society and the state and human nature and human striving the book reveals not only the diversity among christian legal thinkers but also the richness of the christian tradition as a source for intellectual and ethical approaches to legal inquiry the contributors bring various perspectives to the subject some engage the prominent schools of legal thought liberalism legal realism critical legal studies feminism critical race theory and law and economics others address substantive areas including environmental criminal contract torts and family law as well as professional responsibility together the essays introduce a new school of legal thought that will make a signal contribution to contemporary discussions of law

the collection of essays presented here examines the links forged through the ages between the realm of law and the expressions of the humanistic culture we collected thirty five essays by international scholars and organized them into sections of ten chapters based around ten different themes two main perspectives emerged in some articles the topic relates to the conventional approach of law and in humanities iconography literature architecture cinema music other articles are about more traditional connections between fields of knowledge in particular philosophy political experiences didactics we decided not to confine authors to one particular methodological framework preferring instead to promote historiographical openness our intention was to create a patchwork of different approaches with each article drawing on a different area of culture to provide a new angle to the history being told the variety of authorial nationalities gives the collection a multicultural character and the breadth of the chronological period it deals with from antiquity to the contemporary age adds further depth of insight as the element that unites the collection is historiographical interpretation we wanted to bring to the fore its historical depth thus for every chapter we organized the articles in chronological order according to the historical context covered looking at the final outcome it was interesting to learn that more often than not the connection between law and humanities is not simply a relation between a specific branch of the law and a single field of the humanities but rather a relation that could be developed in many directions at once involving different fields of knowledge and of arts and popular culture we are grateful to luigi lacchè for his contribution to this collection his essay outlines the coordinates of the law and humanities world laying out the instruments necessary for an understanding of the origins of a complex methodology and the different approaches that exist within it this project is the result of discussions that took place during the xxiii forum of the association of young legal historians held in naples in the spring of 2017 the book was made possible thanks to the advice and support of cristina vano the editors

we cannot see the world as it is because we face it in a contaminated vein that is our

conceptual scheme and biological constitution condition our world view the legal normative world we are dealing with has some special features like the primacy of practical reason over theoretical reason and the primacy of the internal point of view over the external point of view although it is not a feature of all legal traditions legal dogmatics is a privileged way of knowing legal normative object that is our legal orders but we are not undertaking as legal scholars an empiricist enterprise because among other reasons we are not interested in the reality in itself but in the relevant reality at least for us in this respect we do not only depend on theories like physicists but also on legal authoritative sources that is power and legitimacy legal scholars and other participants in the legal life are not neutral observers of their own world trying to discover some hidden truth they are committed experts trying to describe justify and improve the legal order

the book offers contributions to a philosophical and realistic approach to the place of adjudication in contemporary constitutional democracies bringing together scholars from different legal and philosophical backgrounds the book purports to cast light on the roles of judges and the function of judicial interpretation inside of constitutional states from the standpoint of legal realism as a revisited and sophisticated jurisprudential outlook in so doing the book also copes with a few major jurisprudential issues like e.g. determining the ideas that make up the core of legal realism exploring the relation between legal realism and legal positivism identifying the boundaries of judicial interpretation as they appear from a realist standpoint as well as considering some skeptical outlooks on the very claims of contemporary legal realism

this insightful and highly readable advanced introduction provides a succinct yet comprehensive overview of legal reasoning covering both reasoning from canonical texts and legal decision making in the absence of rules overall it argues that there are only two methods by which judges decide legal disputes deductive reasoning from rules and unconstrained moral practical and empirical reasoning

even though corporate social responsibility csr has become a widely accepted concept promoted by different stakeholders business corporations internal strategies known as corporate self regulation in most of the weak economies respond poorly to this responsibility major laws relating to corporate regulation and responsibilities of these economies do not possess adequate ongoing influence to insist on corporate self regulation to create a socially responsible corporate culture this book describes how the laws relating to csr could contribute to the inclusion of csr principles at the core of the corporate self regulation of these economies in general without being intrusive in normal business practice it formulates a meta regulation approach to law particularly by converging patterns of private ordering and state control in contemporary corporate law from the perspective of a weak economy it proposes that this approach is suitable for

alleviating regulators limited access to information and expertise inherent limitations of prescriptive rules ensuring corporate commitment and enhance the self regulatory capacity of companies this book describes various meta regulation strategies for laws to link social values to economic incentives and disincentives and to indirectly influence companies to incorporate csr principles at the core of their self regulation strategies it investigates this phenomenon using bangladesh as a case study

are national legal cultures in europe converging or diverging as a result of the pressures of european legal integration Åse b grødeland and william l miller address this question by exploring the attitudes and perceptions of the general public and law professionals in five european countries england norway bulgaria poland and the ukraine presenting new findings they challenge the established view that ordinary citizens and people working professionally with the law have different legal cultures their research in fact reveals that the attitudes of citizens in eastern and western europe towards law in principle are remarkably similar whereas perceptions of law in practice differ by country and often correlate with gdp per capita and country ranking in rule of law indices grødeland and miller s innovative methodological approach will appeal to both experts and non experts with an interest in legal culture european integration or european elite and public opinion

there is a myth that lingers around legal education in many democracies that myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education embedded within law school cultures are assumptions that also stymie efforts at reform the book examines hidden pedagogical messages showing how presumptions about theory s relation to practice are refracted through the obfuscating lens of curricula the contributors also tackle questions of class and market as they affect law training finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms the chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty
